

FEAST 2D conditional generation: fidelity, sensitivity, and limits

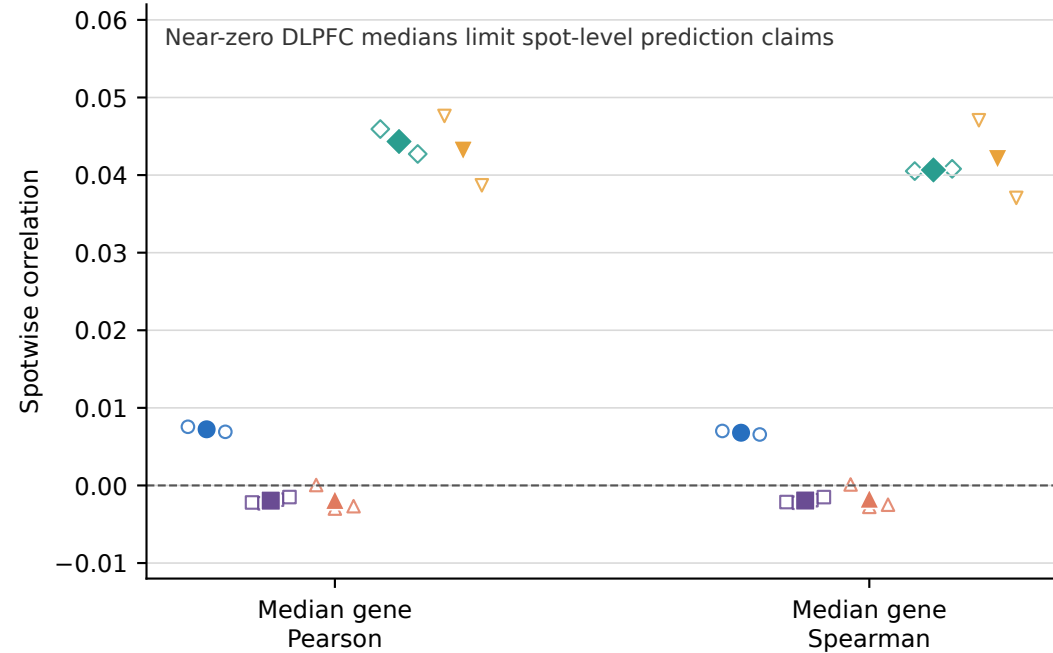

Primary AR = 0.3; target XY and labels are observed covariates. Points show directions/slices; filled symbols show stratum means.

- DLPFC cross-slice, within donor
- ▲ DLPFC half-slice
- ▼ MERFISH half-slice
- DLPFC cross-slice, cross donor
- ◆ MERFISH cross-slice

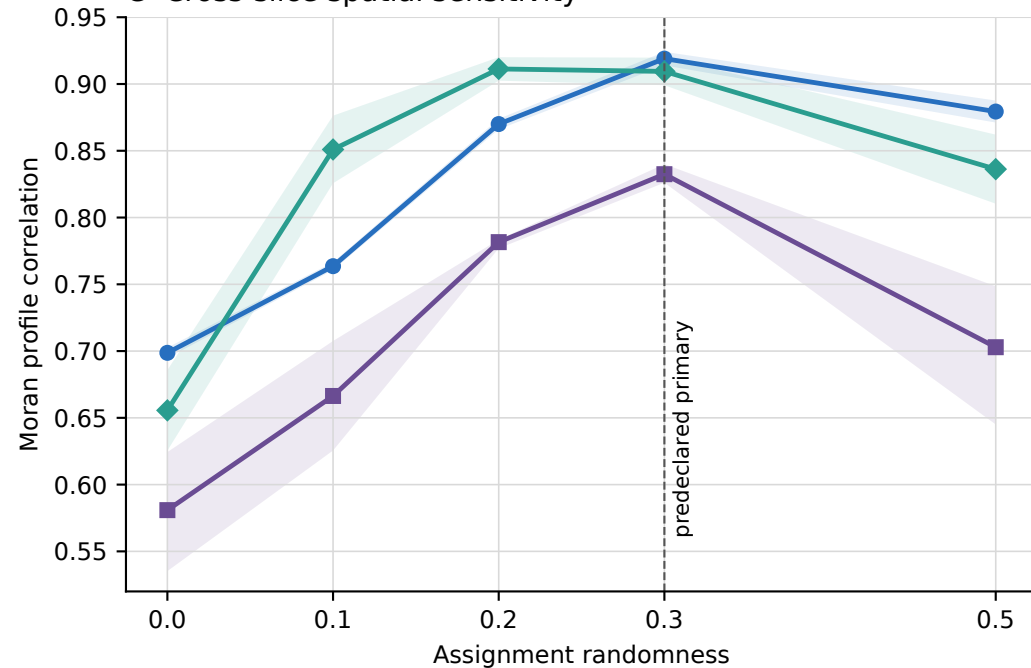

A Aggregate distribution and spatial-statistic fidelity

B Coordinate-wise expression correspondence

C Cross-slice spatial sensitivity

D Target support and reference-gene evidence
